EXPERIENCE

AI Engineer II | American Express | Jan. 2021 – Apr. 2026

Artificial Intelligence Center of Excellence - Global Commercial Services Technology

- Engineered and productionized Logistic Regression Entity Matching system to increase match rate by 15% and add millions of extra records onPrem and on GCP for daily downstream services.
- Innovated an expense management reporting solution with Microsoft leveraging ML algorithms for real time audits
- Designed and constructed an end-to-end full stack solution utilizing BERT and Lex Rank for extractive summarization and comparison of relevant information from SEC 10-K filings to supplement analysts' work
- Developed a tool with KeyBERT and LDA to extract keywords and topics from policies and financial documents
- Saved an annual of \$1M+ USD by creating a 97% accurate Account Payable Standardization ML model
- Forecasted clients and businesses' charge volume of AMEX services by utilizing time series data and DL algorithms
- Innovated an expense management reporting solution with Microsoft leveraging ML algorithms

Technology: Python, PySpark, SQL, Tensorflow, Scipy, Docker, BERT, Deep Learning, React, Google Cloud Platform, Azure

Software Engineering Intern | American Express | Jul. 2020 – Aug. 2020

- Designed and created a custom declaratively rendered React based portal to validate personal identification info
- Implemented APIs to perform both internal and third-party verification for customer compliance decisions

Technology: React, HTML5, CSS, JSON, REST APIs, Java 8

Software Development Intern | Zuora | Jun. 2019 – Aug. 2019

- Created a declaratively rendered, flexible single page shopping checkout flow for end users with data based on APIs
- Prototyped front end of a Reusable company-wide Asset Manager during a hackathon

Technology: Vue.js, Vuetify, HTML5, CSS, JSON, Angular, Git, REST APIs

Quality Assurance Intern | U.S. Bank - Elavon | May 2018 – Aug. 2018

- Automated the process of updating Confluence pages with various performance testing data
- Constructed 2018 Trend Report of valid performance tests based on analysis of performance logs and metrics

Technology: Python, HTML5, JSON, BeautifulSoup4, Linux Bash Scripting, Git, REST APIs

TECHNICAL SKILLS

Programming Languages, Libraries, Toolkits

- Python / React, Vue / HTML5, CSS / PySpark / Hadoop / SQL / Google Cloud Platform / AWS / Azure
- Hugging Face / TensorFlow / PyTorch / Pandas / SciPy / NumPy / NLTK / spaCy
- Logistic Regression / BERT / LLM / Agentic AI / LangGraph / Claude

EDUCATION

MCS Data Science | University of Illinois at Urbana-Champaign | Aug. 2021 – Dec. 2022

GPA 3.9/4.0

- Natural Language Processing, Text Information Systems, Computational Photography, Scientific Visualization, Data Cleaning, Data Curation, Applied Machine Learning, Internet of Things

B.S. Computer Science | Georgia Institute of Technology | Aug. 2017 – Dec. 2020

GPA 3.6/4.0 | Summa Cum Laude | Faculty Honors | Dean's List | Zell Miller Scholarship (100% tuition)

- Machine Learning, Game AI, Intro to AI, Mobile Ubiquitous Computing, User Interface Design, Data Structure and Algorithms, Design & Analysis – Algorithms, Object Oriented Programming, Database Systems
